## WORK EXPERIENCE

november 2016—present

### **Blackbox, Chicago, IL**

Blackbox is a shipping and logistics cooperative that helps independent artists and makers connect with their customers and ship their products internationally with little to no experience in shipping. As a senior user experience designer, I created prototypes, wireframes, and did information architecture for the client and admin portals of the Blackbox product.

november 2013—november 2016

### **gravitytank, Chicago, IL**

gravitytank was an innovation consultancy that applied design thinking to create new product and service offerings for a variety of clients including food and consumer electronics. As an interaction designer, I created prototypes, research stimulus, and inspired new concepts. I also helped plan and facilitate client workshops to immerse clients in design thinking and research findings.

november 2012—october 2013

### **Insight Product Development, Chicago, IL**

Insight Product Development is a product design firm with a specialty in medical device design. As an interaction designer, I create prototypes, wireframes, and facilitated usability research for a variety of clients and product types including a blood glucose monitor, allograft software, and external fixation software.

july—october 2012

### **Nectarine Group, Palo Alto, CA**

Nectarine Group was an enterprise software design firm. As a visual experience designer I created prototypes and lead the visual design and interaction design efforts for both mobile applications and web software. I also helped to manage client relationships and put together project specifications .

## EDUCATION

july 2015
